A young boy with light-colored hair is shown in profile, looking intently at a white rectangular box. The box is tilted and has the 'brodos' logo and tagline printed on it. The scene is lit with a cool, blue-toned light, creating a focused and mysterious atmosphere. The boy's face is partially illuminated, highlighting his concentration.

Anroid Zero Touch Enrollment Program

Android Zero Touch Enrollment

What is Android zero touch enrollment?

Zero touch enrollment makes it possible for Android devices from various manufacturers to be deployed quickly, easily and simultaneously, making it even easier to make them available to employees throughout the organization.

Making it easier to set up devices

- Large-scale deployment of corporate devices by IT department
- No manual set up required
- Out of the box: Users take devices out of the box and can use them straightaway
- Apps, management and configurations are all set.

Individual device management

- Immediate management of devices by IT department
- Automatic installation of management app when setting up device.
- Free choice of enterprise mobility management provider in order to be able to set policies for devices and manage apps.

Setting up devices

- Purchase zero-touch capable devices
- Assign devices to users via the zero touch online platform
- Configure EMM policies to meet your organization's needs
- Device will automatically register with EMM, ready for deployment
