Anroid zero-touch enrollment program

Android zero-touch enrollment

What is Android zero-touch enrollment?

Zero-touch enrollment enables Android devices from multiple vendors to be easily, quickly, and simultaneously deployed, making them even more easily available to employees.

Easy device deployment

- Large-scale deployment of company-owned equipment by the IT department
- No manual setup required
- Out of the box: Users take devices out of the box and can use them immediately
- Apps, device management and configurations already installed

Individual device management

- Instant device management by IT
- Automatic installation of the management app when setting up the device
- Free choice of Enterprise Mobility Management provider to set policies for devices and manage apps

Setup devices

- Purchase of zero-touch-enabled devices
- Allocation of devices to users using the zero-touch portal
- Configure EMM policies to meet the needs of your business
- Provide the devices through automatic registration with the EMM
